

## FAQs

1. 新挖出的币在 200 个块以后才可以用, 大概 10 小时;
2. 永远不需要抵押;
3. 目前是主网的 pre-mainnet 阶段,不是测试网,但是有抗矿霸算法;
4. 可以边 p 边挖, p 盘前需安装.Net framework Runtime 4.7; 下载地址:  
<https://dotnet.microsoft.com/download/dotnet-framework/net47>
5. 如下图,点 Export Plot ID 获得 p 盘 ID, 在 config.yaml 红框所示填入 plot ID 是 893accb84aad6227ffa936a0df263c0512b83525, 绿框填入的相对应的钱包地址是 71HRQSL3hHGB6dnW3DxvAZcyNsgkjape3ze

红框填你的 plot id, 绿框填生成 plot id 的 7 开头的地址, 蓝框填你的 plot 文件目录

```
1 # PLEASE ONLY ENTER YOUR PASSPHRASE BELOW IF YOU ARE GOING TO MINE SOLO!
2 # YOU DO NOT NEED TO ENTER YOUR PASSPHRASE FOR POOL MINING.
3 # NEVER POST YOUR CONFIG.YAML INCLUDING YOUR PASSPHRASE TO ANY BOARD OR CHAT!
4 account id to miner addr: # define accounts and pub key addr for
5 893accb84aad6227ffa936a0df263c0512b83525: '71HRQSL3hHGB6dnW3DxvAZcyNsgkjape3ze'
6
7 plot_dirs:
8   - 'F:\'
9   # - 'C:\second\windows\plot\dir'
10  # - '/first/linux/plot/dir'
11  # - '/second/linux/plot/dir'
12
```

6. 这个提示说明开始正常挖矿了, 只是这次提交的 deadline 不够小, 不会爆块而已:

```
code: 0
message: {"result":{"accept":false,"reject_info":"larger than current candidate deadline or deadline inconformit
y"},"error":null,"id":"rminer"}
16:21:28 [INFO] round finished: roundtime=13236ms, speed=58.02MiB/s B/s
```

7. 每次 p 盘的起始 nonce 号:

第 1 个盘 00100000000000 起始, 也就是 001 后面跟 10 个 0

第 2 个盘, 00200000000000 起始,

第 3 个盘, 00300000000000 起始,

依次类推, 切记不要擅自减少 0 的个数!

8. 挖矿时钱包无需打开, 矿工软件是直接跟链交互
9. 第一次 p 盘可以 p 一个比内存大的文件测试下机器的 p 盘速度, 比如, 内存 16G, 可以 p 个 20G 测试, 但一定要比内存大才能测的相对准.
10. 移动端钱包装完如果是用助记词恢复老的钱包, 需要等待它完成区块同步, 期间不能断开或者让手机黑屏, 否则会出现移动端与桌面端总资产显示不一致问题. 但放心资产不会丢, 都在链上.
11. hdd,wakeup 即唤醒磁盘, 挖矿正常, 不用理会

```
message: {"result":{"accept":false,"reject_info":"larger than current candidate deadline or deadline inconformity"},"error":null,"id":"rminer"}
22:33:15 [INFO] round finished: roundtime=56132ms, speed=132.75MiB/s
22:37:16 [INFO] HDD, wakeup!
22:41:17 [INFO] HDD, wakeup!
22:45:17 [INFO] HDD, wakeup!
22:49:17 [INFO] HDD, wakeup!
22:53:18 [INFO] HDD, wakeup!
```

12. 这个提示是资产需要 2 个确认才可使用, 看交易状态-确认块

### 交易发送失败

Error: No Tx to broadcast.  
Error was: Insufficient  
verified funds (have 0, need  
Amount(6050000)). NOTE:  
funds need 2 confirmations  
before they can be spent.

OK

13. 空间不足以至无法创建新的 plot 文件, 检查-s 和-n 参数是否跟之前的文件名一致

```
C:\Users\Administrator\Desktop> .\graver_cpu.exe -i 035024d36bff8c0e0e0e0e0e0e0e0e0e0e -s 100000000000 -n 228907
52 -p G:\
Graver 2.5.0 - PoC2 Plotter
CPU: Intel(R) Xeon(R) CPU E5-2680 v3 @ 2.50GHz [using 48 of 48 cores (SMD = AVX2)]
Error: insufficient disk space, MiB_required=5722688,00, MiB_available=70.55
Shutting down...
C:\Users\Administrator\Desktop\F盘>
```

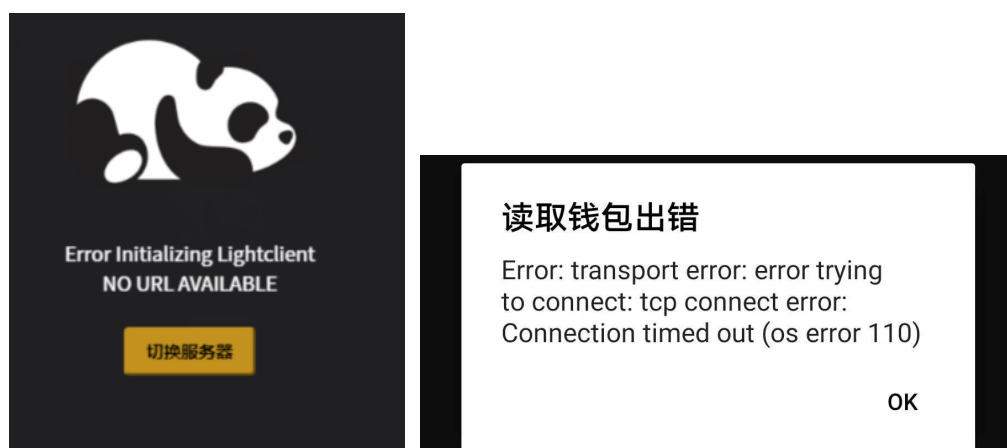

14.出现此错误请关掉钱包,用 clean\_wallet.cmd 清理本地钱包,重新开钱包,导入助记词,等钱包同步完区块

新建记事本-粘贴以下这段 保存为 clean\_wallet.cmd

```
@echo off
cd %~dp0
rd /S /Q %APPDATA%\PANDA > NUL
rd /S /Q %APPDATA%\Zcash > NUL
rd /S /Q "%APPDATA%\ZcashParams" > NUL
rd /S /Q "%APPDATA%\TAO Wallet Lite" > NUL
```

15.此错误连不上钱包节点，请检查本地网络

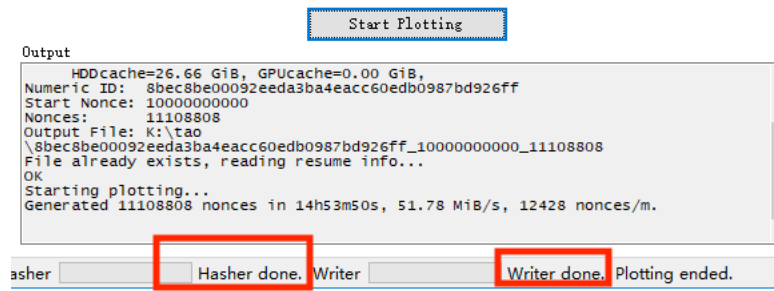

16. 等钱包区块同步到最新 再试

### 交易发送失败

```
Error: SendResponse
{ error_code: -26,
  error_message: "18:
  bad-txns-inputs-spent" }
```

OK

17. 红框英文表示 p 盘完成

18. 频繁出现此错误 请更换钱包节点

```
19:26:51 [ERROR] error getting mining info => connection outage...
19:26:54 [ERROR] outage resolved.
19:28:42 [INFO] HDD, wakeup!
19:29:49 [ERROR] error getting mining info => connection outage...
19:29:52 [ERROR] outage resolved.
19:29:52 [INFO] new block: height=57939, scoop=3687
19:29:52 [INFO] round finished: roundtime=314ms, speed=1518.72MiB/s
GB/s
19:33:10 [INFO] new block: height=57940, scoop=3341
19:33:10 [INFO] round finished: roundtime=330ms, speed=1445.09MiB/s
GB/s
19:36:09 [ERROR] error getting mining info => connection outage...
19:36:11 [ERROR] outage resolved.
19:37:13 [INFO] HDD, wakeup!
```

### 挖矿节点选择

-----

矿工配置文件 config.yaml 的 url 行改为如下即可:

华东节点:

url: 'http://61.147.239.40:19456'

南京节点:

url: 'http://118.195.183.77:19456'

西北节点:

url: 'http://211.139.93.222:19456'

江苏节点:

url: 'http://36.150.108.66:19456'

海外节点:

url: 'http://s0.thetao.cash:19456'

url: 'http://s3.thetao.cash:19456'

url: 'http://s4.thetao.cash:19456'

url: 'http://s5.thetao.cash:19456'

## 19.如何添加更多 plot 文件目录

```
7 plot_dirs:
8   - 'D:\'
9   - 'F:\'
10  - 'G:\'
11  - 'H:\'
12  - 'I:\'
13  - 'J:\'
14  - 'K:\'
15  - 'L:\'
16  # - 'C:\second\windows\plot\dir'
17  # - '/first/linux/plot/dir'
18  # - '/second/linux/plot/dir'
19
20 url: 'http://211.139.93.222:19456'
```

## 20.PC 端出现此错误请在菜单选择 重新扫描区块
